

April 26, 2024

To all tire retailers and generators,

Due to the increasing population and several other factors, there has been a large increase year over year of scrap tires being generated throughout the province. Liberty Tire's mission is to collect and recycle all tires in British Columbia as safely and as efficiently as possible.

To keep up with the increased number of tires and to ensure the continued success of BC's tire recycling program, Liberty Tire will be undergoing a major upgrade at our facility in Delta. This upgrade is set to begin May 13, 2024, with an estimated completion date of June 17, 2024. We are looking at all options to attempt to not have any service disruptions, however during this time collection services may be delayed.

We appreciate everyone's patience and understanding during this time. Should you have any questions or concerns please call 1-866-497-0281 or email BCTireCollections@libertytire.com

Thank you,

Joe Pitre
Regional Logistics Manager
