 Stockpile Removal 11

PROGRAM: MANUFACTURING 12

 Manufacturing Incentives 12

PROGRAM: RESEARCH & DEVELOPMENT 14

 Research & Development Support..... 14

PROGRAM: COMMUNITY GRANTS 16

 Community Grant..... 16

All policies are subject to review and revision from time to time at TSBC’s sole discretion.

GLOSSARY OF TERMS

Advance Disposal Fee or ADF means the eco-fee that Registered Retailers remit to TSBC for every new Program Tire sold and which funds the TSBC Program.

Form A means the waste manifest prescribed by TSBC as the authority to collect Program Tires.

Crumb means crumb rubber purchased from a Processor that has received a Processing Incentive under the TSBC Program.

Crumb Derived Product means products containing Crumb that are manufactured in BC by a Manufacturer.

Hauler or Transporter means a Person engaged in the business of collecting and transporting Program Tires from a Registered Retailer or a Registered Generator that has an agreement with the Processor to accept their Program Tires.

Imported Tires means whole tires or semi processed tires generated from a location outside British Columbia.

Inventory means whole or semi-processed Program Tires, Non- Program Tires or Imported Tires and finished product or residuals from TDP or TDF processes from Program Tires, Non- Program Tires and Imported Tires under the control of the Processor.

Manufacturer means a Person that has executed a Manufacturer Agreement with TSBC.

Manufacturer Agreement or MA means the contract executed between TSBC and a Manufacturer to formalize the terms of participation in TSBC's Manufacturing program.

Manufacturing Incentive or MI means the financial incentive, as from time to time determined and payable by TSBC to the Manufacturer to manufacture Crumb Derived Product from Crumb under the terms of the Manufacturer Agreement and the Policies and Procedures.

Non- Program Tire shall have the meaning as set in Section II of [Schedule A](#), posted on the TSBC web site.

Person means any natural person, sole proprietorship, partnership, corporation, trust, joint venture, any governmental authority or any incorporated or unincorporated entity or association of any nature.

Policies and Procedures means the policies and procedures published by TSBC and delivered to the Processor and / or Manufacturer as amended from time to time.

Processing Incentive or PI means the financial incentive, as from time to time determined and payable by TSBC to the Processor to process Program Tires from a Registered Retailer or Registered Generator under the terms of the Processor Agreement and the Policies and Procedures

Processor means a Person that has executed a Processor Agreement with TSBC.

Processor Agreement or PA means the contract executed between TSBC and a Processor to formalize the terms of participation in TSBC's Tire Collection and Processing (TCP) program.

Program Tire shall have the meaning set out in Section 1 of [Schedule A](#) as posted on the TSBC web site and exclude Imported Tires.

Registered Generator (Generator) means a Person that generates scrap tires and is registered with TSBC as a generator.

Registered Retailer (Retailer) means a Person that sells Program Tires or equipment with Program Tires on it and is registered with TSBC as a retailer.

TDF means tire derived fuel.

TDP means tire derived product.

Transportation Incentive or TI means the financial incentive, as from time to time determined and payable by TSBC to the Processor for the collection and transportation of Program Tires from a Registered Retailer or Registered Generator to the Processor.

TSBC means Tire Stewardship BC.

TSBC Program means the collective suite of programs under TSBC, including the Tire Collection and Processing program (TCP), the Manufacturing program, the Research & Development program, and the Community Grant program.

PROGRAM: TIRE COLLECTION AND PROCESSING (TCP)

Becoming a Processor

Policy:

In response to a need for additional processing capacity in BC, as determined by TSBC from time to time, applications will be accepted from interested parties to become a Processor in BC.

Anyone wishing to become a Processor will be required to achieve “**more** new value from old tires” through (1) product/market innovation and/or (2) processing innovation, either of which will significantly reduce TCP program incentive costs without jeopardizing TSBC Program stability and environmental results.

Implementation:

The document [*“Becoming a Processor: Policy, Requirement, Process, Steps and Fees”*](#) outlines the criteria and application process to become a Processor.

Effective May 01, 2014 and until further notice, TSBC has determined the need does not currently exist for additional processing capacity in BC, and as such will not be accepting applications. Any change will be published on the TSBC web site.

Audit Requirements

Policy:

TSBC may, at its sole discretion, require that participants who receive funds under the TCP program submit audited financial statements. The cost of these audits will be borne by the participants.

Exclusive Rights

Policy:

TSBC will not grant exclusive territorial collection rights to any participant in the TCP program.

Tipping Fees

Policy:

Tipping/collection fees on tires attracting an Advance Disposal Fee cannot be charged to Retailers and Generators that:

- Have a minimum of 50 scrap tires, clean and off rims, for pick-up; and

- Make scrap tires easily and readily accessible in that they are stored in a location that is clear of any obstructions and/or debris, allowing the tires to be directly loaded onto the Hauler’s truck.

Implementation:

Retailers and Generators who desire a higher standard of service than the norm should expect to pay additional service fees to cover the added expense incurred by Haulers and/or investigate their options for the best combination of rates and service.

Ownership of Tires

Policy:

TSBC is not the owner of scrap tires in the Province of British Columbia and makes no representation or warranty as the volume of scrap tires available for collection and processing.

Incentive Rates – Transportation

Policy:

The Transportation Incentive rates in effect as of the date of this policy document are as follows:

Distance range (km)	\$ per km/per tonne	Distance range (km)	\$ per km/per tonne
0 – 30	4.094	901- 1000	0.291
31 – 75	2.859	1001 – 1100	0.279
76 – 125	1.892	1101 – 1200	0.265
126 – 200	1.363	1201 – 1300	0.254
201 – 300	0.666	1301 – 1400	0.238
301 – 400	0.531	1401 – 1500	0.236
401 – 500	0.470	1501 – 1600	0.230
501 – 600	0.399	1601 – 1700	0.227
601 – 700	0.358	1701 – 1800	0.222
701 – 800	0.330	1801 – 1900	0.218
801 – 900	0.309	1901 - 2000+	0.210

Implementation:

Transportation Incentive rates are reviewed periodically. See the TSBC policy [Incentive Rates – Review and Implementation](#).

Note that incentive payments may be subject to the TSBC policy [Eligible Distance for Transportation Incentives](#).

Incentive Rates – Processing

Policy:

(a) Tire Derived Product (TDP) incentive rates in effect are as follows:

Category	Rate	Description
TDP 1	\$348.15 per tonne	For scrap tires processed into a crumb rubber or powder form, having a particle size up to approximately 5/16" and free of steel and fibre.
TDP 2	\$140 per tonne	For scrap tires that are utilized essentially in their original form (e.g., blasting mats).
TDP 3	\$69 per tonne	For high-volume applications such as coarse shred used as road-fill (commonly known as Tire Derived Aggregate, or TDA).
TDP 4	\$0	For products made from the whole tire in its original form or where the tire will be sold as a used tire.
TDP 5	\$140 per tonne	For the shearing and disposal of BC generated program scrap tires that cannot be processed but have received an Advance Disposal Fee.
TDP 6	\$0 per MT	For Medium Truck (MT) Tires received for processing into either TDP 1 or TDP 7.
TDP 7	\$284.94 per tonne	For coloured rubber granules with a particle size range of >5/16 up to 3/4" and free of steel for use as recycled rubber mulch typically used as landscape cover. For uncolored, the rate is \$214.24 per tonne.
TDP 8	\$158.54 per tonne	For steel (bead wire and fines) extracted from the scrap tire during the recycling process and sold to an end market.

NOTE: TSBC may consider additional TDP rates for processing categories not captured in this table.

(b) Tire Derived Fuel (TDF) incentive rates in effect are as follows:

Category	Rate	Description
TDF 1	\$131.76 per tonne	For shred processed for energy recovery.
TDF 2	\$60 per tonne	For whole tires processed for energy recovery.
TDF 3	\$158.54 per tonne	For fibre extracted from the scrap tire during the recycling process and sold for energy recovery.

NOTE: Medium Truck tires are not eligible for TDF Processing Incentives unless pre-approved by TSBC.

Implementation:

Processing Incentive rates are reviewed periodically. See the TSBC policy [Incentive Rates – Review and Implementation](#).

Incentive Rates – Ferry and Barge

Policy:

Eligible scrap tire loads qualify for a standard reimbursement of One-Way Ferry Incentives (either way, *as eligible*). One-Way Ferry Incentives include:

- One-way ferry fare for the truck, driver and when applicable a swamper; plus
- A downtime allowance.

Policy Exception: Scrap tire loads travelling by ferry from the Gulf Islands to a registered processing facility are eligible for reimbursement of the ferry fare, driver and downtime *both ways*. The Gulf Islands include Bowen Island. (This exception does not apply to the Queen Charlotte Islands.)

Implementation:

Load Size:

The one-way ferry fare including driver and downtime (if applicable) will be prorated based on the size of the load. TSBC has set a predetermined capacity for each load at .252 tonnes per linear foot of trailer space. Loads that do not meet this predetermined capacity will be prorated. Exceptions apply to the Gulf Islands.

Load eligibility requirements:

- **All** loads travelling by ferry/barge, regardless of size/weight, **must** be weighed and the original weigh scale ticket submitted with the corresponding Form A(s);
- The original ferry fare receipt **must** be submitted with the corresponding Form A(s) to allow for pro rating based on the actual ferry fare paid;
- The Transporter **must** indicate on the ferry receipt the size of trailer (i.e., the area where the tires are stored) used to transport the load; and
- Should the load exceed the predetermined capacity, the reimbursement will **not** exceed the maximum amount eligible, i.e., the actual ferry fare paid including driver, and downtime (if applicable).

Downtime Allowance:

No supporting documentation is required to claim the downtime allowance. For each eligible load, a downtime allowance can be claimed for the time the driver has to wait for the ferry, recognizing this can vary significantly depending on the route. All claims for downtime allowance must be approved by management at the receiving processing facility before the claim is filed with TSBC.

Incentive Rate Restrictions - Eligible Distance for Transportation Incentives

Policy:

TSBC provides for the payment of Transportation Incentives for scrap tires shipped from the Generator or Retailer to the nearest eligible Processor *with the capability and capacity to accept the particular type of scrap tire for recycling (TDP) or energy recovery (TDF)*.

Implementation

It is not TSBC's intent to provide a geographic advantage to any one Processor. To ensure fairness, in invoking an Eligible Distance policy, access to scrap tires anywhere in the province would not be restricted to any specific registrant – only the Transportation Incentives related to the tires would be limited.

TSBC will invoke the Eligible Distance policy immediately upon approving an additional Processor. Once invoked, for purposes of the Transportation Incentive, TSBC will establish a table of eligible distances to each Processor's facility.

Incentive Rate Restrictions – Culled Tires

Policy:

Transportation Incentives and Processing Incentives are not available for used tires that are diverted into the used tire market for reuse as a tire.

Incentive Rate Restrictions – Export

Policy:

Processing Incentives are not available for the export of TDF, whole tires, or semi-processed tires (i.e., where further processing will be required to create the end product).

Incentive Rate Restrictions – Paying for Tires

Policy:

TSBC will not pay Transportation Incentives or Processing Incentives for TCP program tires received at a Processor facility that were not supplied free of charge to that Processor or Hauler.

Incentive Rates – Review and Implementation

Policy:

TCP program incentive rates will be reviewed by TSBC on a periodic basis. Where adjustments are determined appropriate, the changes will be communicated to affected parties on a timely basis.

Implementation:

1. *Approximate rate review schedule*
 - a. Transportation Incentive rates
 - Every quarter for the fuel cost component
 - Every year for the non-fuel cost component
 - b. Processing Incentive rates
 - Annually in consultation with the affected party

- A Sustainability Review conducted every 3 years

2. *Effective dates of increases*

Changes which increase the level of an incentive may be implemented immediately but no later than 30 days following TSBC approval.

3. *Effective dates of decreases*

With the exception of changes resulting from reviews of the TI fuel cost component, changes which decrease the level of an incentive will be effective following a period of one year, but may be implemented sooner if acceptable to directly affected parties, subject to item 4 below.

4. TSBC reserves the right to change incentive levels at any time when necessary for the viability of the TCP program or to achieve important program goals, following consultation with, and as much notice as possible to, affected parties.

Definition of “Eligible Sale”

Policy:

TSBC defines an eligible sale as **“an arm’s-length transaction”** for which the required **“proof of sale”** is rendered to the TCP program. Related persons and companies are deemed not to be dealing with each other at arm’s length.

Policy Exception: The requirement for an arm’s length transaction is waived when the registrant is both a Processor and Manufacturer. However, when the same entity is claiming both a Processing Incentive and a Manufacturing Incentive, the Processing Incentive, for the product that is also eligible for the Manufacturing Incentive, is only payable to the Processor once the eligibility for payment of a Manufacturing Incentive on that same product has been achieved.

Implementation:

Arm’s length transactions

The onus will be on the incentive claimant to prove by the facts of a situation that a transaction was at arm’s-length. If the incentive claimant fails to meet this onus, the transaction will be considered not at arm’s length and consequently will not qualify for the financial incentive.

Related persons are generally those connected by blood, marriage or adoption. Related companies include those in which one company owns a significant interest in the other, or where a shareholder of one company owns a significant interest in the other company. The determination of whether an interest is “significant” will be at the sole discretion of TSBC, and reasonableness will be the key. (*Company/shareholder* may be replaced with *partnership/partner*, for purposes of this definition.)

Proof of Sale

The proof of sale in support of a claim for Processing and/or Manufacturing Incentives includes but may not be limited to:

1. A copy of the sales invoice clearly indicating:
 - Purchaser's name, address, and telephone number;
 - Seller's name, address, and telephone number;
 - Date of the sale;
 - Date of product shipment (*see A*);
 - Name or description of product sold (*see B*);
 - Weight of product sold (with original weigh scale tickets) ;
 - Proceeds of the sales transaction (*see C*); and
 - Terms of payment.
 - A. *Product Shipment*: TSBC reserves the right to verify with the purchaser the receipt of a product for which a financial incentive is being claimed.
 - B. *Product*: Must be a product for which eligibility and incentive rates have been confirmed by TSBC. TSBC reserves the right to verify with the purchaser the final application of a product for which a financial incentive is being claimed.
 - C. *Proceeds*: TSBC reserves the right to verify the proceeds received by a participant for any sale for which a financial incentive is being claimed.
2. For submission to TSBC upon request:
 - Copies of the waybills, bills of lading, or other proof of product shipment to purchasers. At its sole discretion, TSBC may require submission of shipping documents to support each claim for financial incentives;
 - Copies of production records sufficient to support the quantity and quality of tire material contained in the final products claimed for financial incentives; and
 - Weigh scale tickets, acceptable to TSBC, to support the weight of the tire material contained in the product sold.

Maximum Inventory Limits

Policy:

A Processor will be permitted to accumulate a total maximum Inventory of whole tires, processed tires, semi-processed tires or finished products up to a maximum of six months sales. This is a maximum limit; at its sole discretion, TSBC may impose lower Inventory levels or further restrictions.

The maximum Inventory limit for a Provisional Processor will be determined by TSBC on a case by case basis.

Implementation:

The maximum permitted Inventory will be established by TSBC in consultation with the affected Processor.

A Processor may accumulate, up to the maximum Inventory limit, BC scrap tires including regulated and unregulated tires, in whole or processed form in aggregate at all sites controlled by the Processor or Provisional Processor.

At its sole discretion, TSBC may withhold incentive payments to a Processor that has exceeded their maximum Inventory limit and/or may redirect any surplus Inventory to an alternate location.

See also the TSBC policy [Security Requirement](#).

Security Requirement

Policy:

Each Processor with an Inventory limit of greater than 50 tonnes must post a TSBC-approved security based on the Processor's set Inventory limit, with a required minimum security of \$100,000 to assure fulfilment of the Processor's obligations to TSBC.

Implementation:

A security is defined as a non-cancelable commitment. The forms of security acceptable to TSBC are cash or irrevocable letter of credit; any other forms of security require pre-approval.

In the event a Processor abandons its site or is otherwise unable to process and/or sell its Inventory, the security must assure payment, to the extent stipulated, of any loss sustained by TSBC and/or costs incurred to clean up the site. The security may also be used to recover any overpayment of TCP program incentives.

Processors in continuous operation as a Processor for five or more years and during that period have

- undergone a TCP program risk and controls review,
- submitted, on an on-going basis, timely and accurate Inventory reporting and claim submissions, and
- operated in compliance with TCP program policy,

may, at TSBC's sole discretion, have the amount of required security reduced by 50% to signify the decrease in risk of the Processor's abandonment of the site.

Stockpile Removal

Policy:

Applications for additional assistance will be considered on a site-specific basis where the available Transportation Incentives are insufficient to cover scrap tire stockpile removal costs. Removal of tires from a privately-owned site is not eligible for assistance.

Implementation:

All applications are subject to availability of TSBC funds. Any funding provided is a one-time contribution on the understanding that a tire management program will be initiated to avoid the need for any future clean-up project.

PROGRAM: MANUFACTURING

Manufacturing Incentives

Policy:

To promote the increased use of BC recycled rubber, TSBC will provide an incentive to eligible BC manufacturers for the use of BC recycled rubber in recycled rubber products. TSBC's goal is to create stable and sustainable markets for Processors and recycled rubber supplies for BC manufacturers.

Implementation:

1. Eligibility

Each manufacturer must apply to become a TSBC Manufacturer. The eligibility criteria include but may not be limited to the following:

- a. The applicant must be a BC registered company;
- b. The applicant should have the capability, capacity and commitment to use a minimum of one million pounds of recycled rubber annually in the manufacture of eligible recycled rubber products;
- c. The applicant must enter into a Manufacturer Agreement with TSBC in order to receive financial incentives under the Manufacturing program; and
- d. If the applicant qualifies as both a Processor and a Manufacturer, TSBC may deem the applicant to be both an approved Processor and Manufacturer and eligible for Processing Incentives separate from Manufacturing Incentive (MI) payments, and set conditions for that eligibility as well as adjustments to incentive rates.

2. Eligible Products

Each product or product type will be evaluated by TSBC for eligibility. The eligibility criteria for classification as an approved Recycled Rubber Product (RRP) include may not be limited to the following:

- a. The product must be manufactured in BC; and
- b. The recycled rubber used to produce the product must be sourced from a Processor and must be eligible for the Processing Incentive.

3. Level of Funding

The absolute value of incentives available in any given year will be established by TSBC according to the following principles:

- a. To protect overall stewardship program affordability and viability, the absolute value of funding available in any given year will be governed by TSBC's annual budgeting process. Input from existing and prospective Manufacturers on their recycled rubber requirements will be sought in an open and transparent process. In the event that TSBC is unable to fulfil all demands for the MI, the criteria for allocating recycled rubber commitments will be established in consultation with the key stakeholders affected; and
- b. To provide the level of continuity needed to achieve sustainable recycled rubber markets, the Manufacturer and TSBC will establish recycled rubber volume commitments in Schedule A of their

Manufacturer Agreement, and these commitments will be updated annually for the life of the agreement.

The incentive rates available to Manufacturers will be established by TSBC according to the following principles:

- a. The maximum MI rate payable will be \$0.05 per pound (\$110 per tonne) for the recycled rubber content in approved RRP;
- b. The MI rate may vary by RRP;
- c. One or more MI rates and related payment terms will be established for each Manufacturer and documented in Schedule A of their agreement, and reviewed annually for the life of the agreement; and
- d. The MI rate schedule may be amended from time to time by TSBC.

4. *Other Restrictions*

- a. The MI will be paid to Manufacturers only.
- b. MI claims are subject to the documentation requirements outlined in the TSBC policy *Definition of "Eligible Sale"*.
- c. Manufacturers shall provide all information and records relative to volumes, expenses and any matter relevant to a request for payment under the Manufacturing program as may be required by TSBC from time to time.
- d. Payments shall not exceed expenses of a Manufacturer in any event.

AMENDMENT – JANUARY 01, 2021

1. Effective Jan 01, 2021, the MI funding as outlined above will only be available for 4 years for any new manufacturers that apply and are approved subsequent to January 01, 2021.
2. Upon the conclusion of the 4 years for current and future Manufacturers, the MI available to the Manufacturer will either:
 - a. Cease in its entirety; or
 - b. Transition over a 4-year period with MI funding reduced each year but replaced with available funding for industry development projects. After 4 years the MI will be at \$0 and no industry development funding will be available.

Note: the decision on whether options a or b are followed will be at the discretion of the board and will be situationally dependent.

Process, eligibility, and payment for MI & Industry Development Funding

The Process

1. On or before September 01 every year, the Manufacturer will provide TSBC with:
 - a. its estimated volume for the upcoming calendar year; and

- b. its proposed project (s) for the upcoming calendar year that would qualify for TSBC industry development funding, i.e. the project (s) would benefit the Tire Recycling Industry, the Province and the Manufacturer. See project eligibility section below.
2. TSBC will review the proposed project (s) and conclude its review, including notification to the Manufacturer on the project (s) eligibility, prior to preparing the following years budget – typically early October.
3. TSBC will advise the Manufacturer of the proposed budget amounts – both MI & industry development funding - prior to the budget review by the Audit & Investment Committee, typically late November.
4. Final notification to the Manufacturer will be given upon the budget approval, typically mid-December.

Project Eligibility

- Projects can include but not be limited to Product Research and Development, Process Optimization, Product Marketing or Capital Investment.
- The project is intended to benefit the scrap tire recycling industry as a whole, British Columbia and the Manufacturer.
- The Manufacturer must be providing, at minimum, twice the level of funding provided by TSBC.

Note: it is not the intention that TSBC will approve the project (s) but rather TSBC will review the project for the purpose of confirming it is eligible for industry development funding.

Payment

- The payment process for the MI will continue to be processed through the incentive claims system.
- For the industry development funding the Manufacturer will provide an update on the projects quarterly, and a concluding report at the end of the calendar year updating TSBC on the actual projects concluded, funds spent and the outcomes of these projects and how the work done benefitted the Industry, the Province and the Manufacturer. Payment of the industry development funding will be made upon conclusion of the project or upon request, and with TSBC board approval, on a predetermined schedule to align with specific stages of the project, i.e. staged payments.

PROGRAM: RESEARCH & DEVELOPMENT

Research & Development Support

Policy:

TSBC will consider proposals for Research & Development (R&D) support for projects that support the achievement of TSBC's vision and goals, as noted below:

VISION

All scrap tires are transformed to the environmental, economic, and social benefit of BC's citizens.

GOALS

- *To support the environmentally friendly and sustainable collection and management of 100% of regulated scrap tires available for collection.*
- *To sustain or reduce the "average" Advance Disposal Fee.*
- *To maintain TSBC financial stability.*
- *To foster and support innovation and research relative to higher valued solutions within the industry.*
- *To assist the industry in building sustainable markets for recycled rubber products.*
- *To support community projects that use BC recycled rubber.*
- *To support the pollution prevention hierarchy as referenced in the BC Recycling Regulation.*
- *To provide public education on the benefits of maintenance and inflation of tires to extend tire life thereby avoiding scrap tires entering the waste stream.*

Implementation:

- Projects must take place within BC and achieve one or more of the benefits identified in TSBC's vision:
 - Environmental, e.g. a better environmental footprint for TSBC but not to the detriment of other industry sectors
 - Economic, e.g. program cost reduction
 - Social, e.g. job creation
- Those who can apply are BC-based individuals or organizations, such as governments, universities, colleges, not-for-profits, private or publicly-traded companies, institutions, or others.
- Support for up to 50% of eligible project costs for projects to a maximum of \$100,000 per project will be considered. Project duration should be no more than 2 years in length. This support may be provided as a grant, loan or incentives at the sole discretion of TSBC. TSBC will provide financial support commensurate with the opportunity to achieve TSBC's vision and goals. The disbursement schedule may include both upfront and/or milestone-based payments and will be finalized through negotiations between TSBC and the applicant.
- TSBC's financial support will only be applied to project costs that are directly associated with the execution of the project.
- Applicants and their partners collectively are expected to contribute a minimum of 100% of the amount of funding being requested of TSBC with the following restrictions:
 - In-kind contributions may be considered as part of the proponent's contribution to the project;
 - Must not include amounts already contributed to get the project to its current state, i.e. it must be new contributions, not past contributions.

A full copy of the R&D program guide including the application process is available by calling the office at 1.866.759.0488

PROGRAM: COMMUNITY GRANTS

Community Grant

Policy:

The Community Grant program will consider financial support to communities that have decided to use and benefit from a wide range of recycled tire products in their projects. Eligible projects typically involve recreational facilities such as playgrounds, all weather sports fields, running tracks and arena flooring.

Implementation:

“**Community**” means not-for-profit organizations within the province of BC including: municipalities; registered non-profit community groups or organizations; schools; and First Nations and Métis settlements.

Grants are provided on a “**matching funds**” basis where the applicant must contribute an amount equal to or exceeding the grant requested, to a maximum of \$30,000 including freight costs and installation. Funding for installation will only be given where the installer provides a written warranty.

Project Eligibility Conditions

- Only products (a) made in BC (b) from BC scrap tires (c) that come with a written warranty will be eligible for funding.
- The project site must be fully accessible by all members of the public.
- The site must also be wheelchair accessible.

Applications will not be accepted for projects that are already completed.

Interested parties can visit <https://tsbc.ca/community-events-programs/the-tsbc-community-grant-program/> to download the application form including detailed information on eligibility and approval requirements.
